AI-Powered Turmeric Health Analysis Report

Report Date:	2026-07-04 11:41	Report ID:	N/A
Farmer:	N/A	Location:	N/A
Phone:	N/A	Plant Part:	N/A

Crop Health Score

67.1 / 100

Disease Detection Results

Parameter	Value
Disease Name	N/A
Confidence	0.0%
Severity	N/A
Affected Part	N/A
Plant Part Analyzed	N/A

Color Analysis

Color	Percentage	Interpretation
■ Green	0.0%	Healthy chlorophyll content
■ Yellow	0.0%	Chlorosis / Stress indicator
■ Brown	0.0%	Necrotic tissue / Disease
■ Other	0.0%	Background / Soil / Other
Condition	N/A	
Health Index	0.0 / 100	

Prevention Tips

1. Remove and destroy all infected plant material from the field immediately.
2. Apply recommended fungicide/bactericide at the prescribed dosage.
3. Maintain proper field drainage to reduce moisture stress.
4. Avoid overhead irrigation; use drip or furrow irrigation.
5. Schedule follow-up inspection after 14 days.
